# ABOUT US

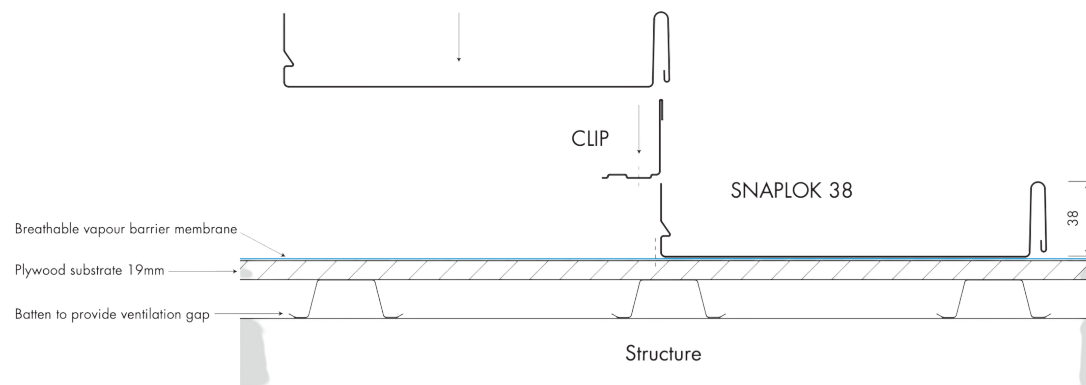

Steeline Canberra is a locally owned and operated member of the 100% Australian Steeline Group of independent steel roofing specialists. Our extensive range of roofing and cladding products are manufactured right here in Canberra from only the best BlueScope Colorbond® and Zinalume® steels.

We also sell an extensive range of complimentary products for your roofing or cladding project, including Spantec light structural steel beams, Versiclad insulated panel systems, a range of skylights from Velux, as well as insulation, fasteners and more.

# SNAPLOK

SNAPLOK is available in 25mm and 38mm rib heights. Fixing clips are screwed every 600mm. The joining panel snaps over the clip and the under rib with no mechanical seam locking required. The clip system allows for thermal expansion.

38mm high wall cladding can be installed on battens at 600mm centres with no substrate required.

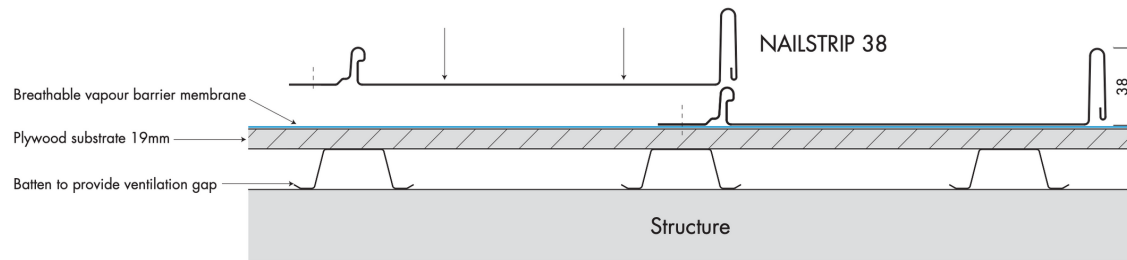

**AVAILABLE IN COLORBOND®, COLORBOND® MATT, ZINCALUME® & UNICOTE LUX®**

# NAILSTRIP

NAILSTRIP is available in 25mm and 38mm rib heights. It is easy to install using screws every 300mm along the panel's perforated edge. The joining panel snaps over the low rib with no mechanical seam locking required.

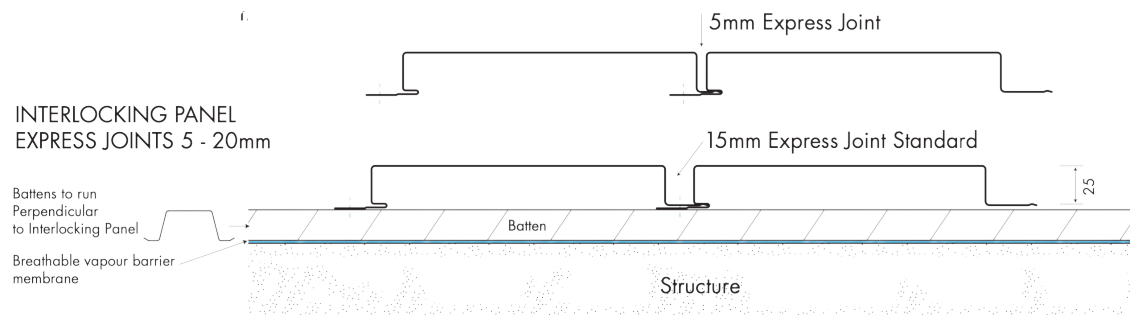

**AVAILABLE IN COLORBOND®, COLORBOND® MATT, ZINCALUME® & UNICOTE LUX®**

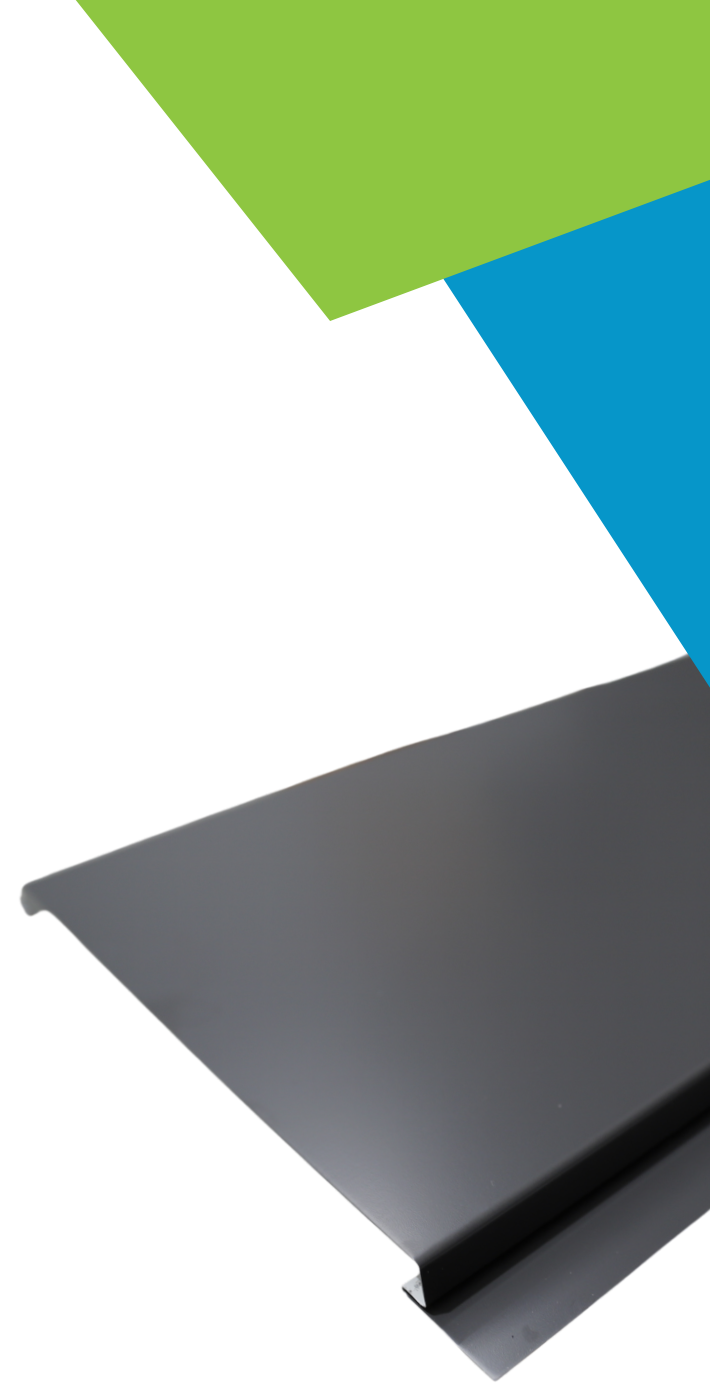

# INTERLOCKING WALL PANEL

Interlocking Panel is fixed to batten attached to main structure (concrete, brick, steel etc.) which provides a ventilation air gap. A breathable vapour barrier membrane is required between the structure and the batten. Panel interlocking groove provides a variable express joint 5-20mm. Panel can be fixed vertically or horizontally.

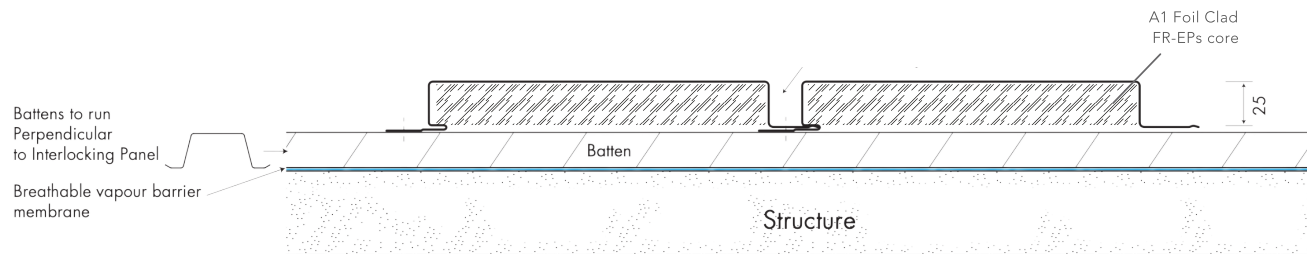

**AVAILABLE IN COLORBOND®, COLORBOND® MATT, ZINCALUME® & UNICOTE LUX®**

# INSULOK® INTERLOCKING PANELS

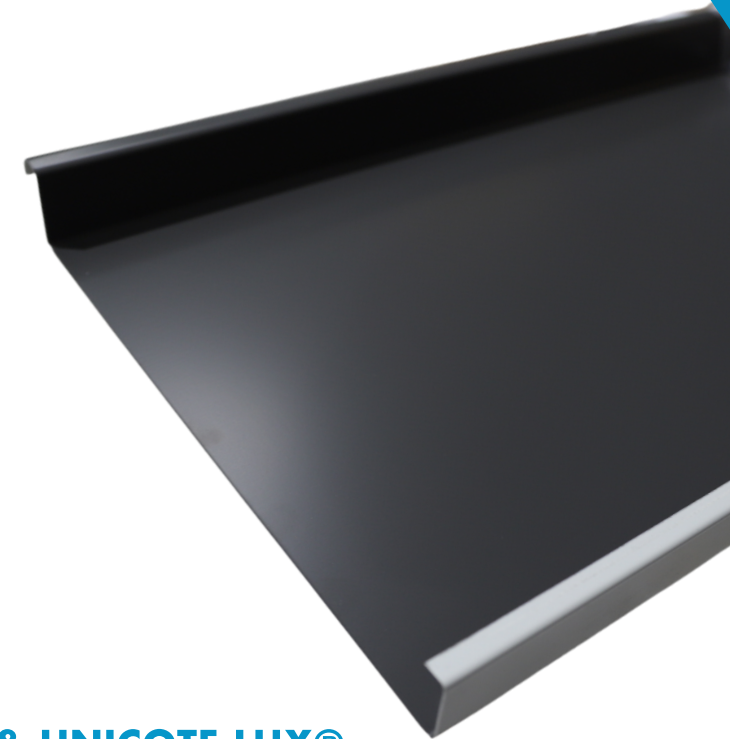

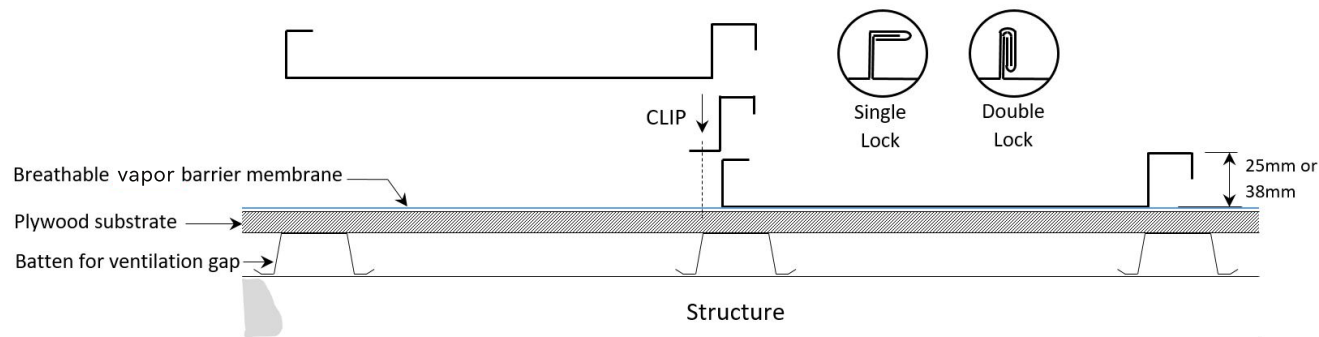

Insulok® Interlocking Panels are interlocking wall panels with a bonded core of foil lined, fire retardant expanded polystyrene. Exclusive to Steeline, Insulok® Interlocking Panels offer resistance to oil-canning and improved acoustic properties, along with added thermal insulation when compared with standard interlocking panels. Panel can be fixed vertically or horizontally.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT, ZINCALUME® & UNICOTE LUX®**

# STANDING SEAM

Standing seam is a versatile cladding system. Standing seam cladding involves two interlocking panels seamed and lapped. Each of the panels is fastened against plywood using concealed clips and locked together. Available with rib heights of 25 and 38mm. This cladding can be installed across numerous applications, including roofing, facades, soffits and even on internal walls for an architectural feature finish.

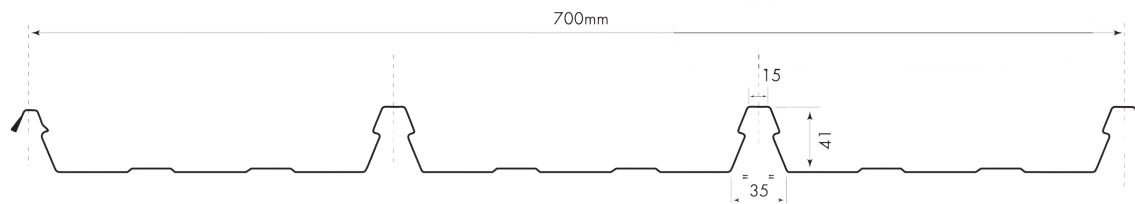

**AVAILABLE IN COLORBOND®, COLORBOND® MATT, ZINCALUME® & UNICOTE LUX®**

# LOKDEK 700

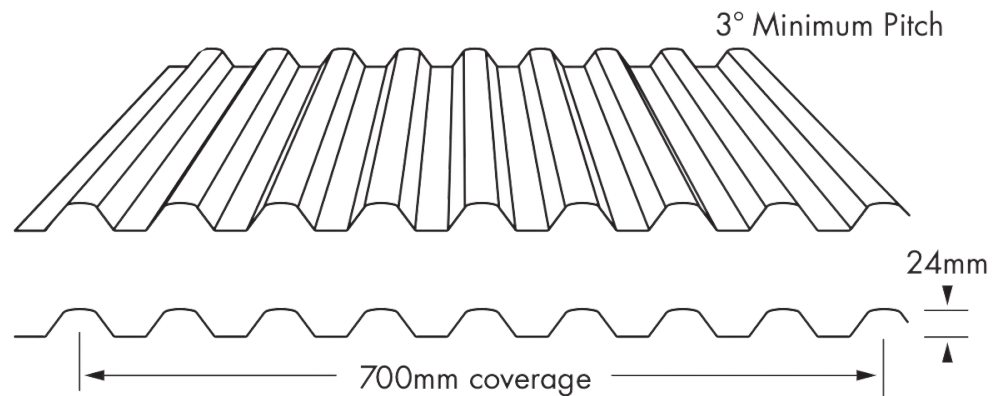

LOKDEK 700 is a concealed fixed roof using NO roof piercing fasteners. This allows thermal expansion on long roof sheets. Wide spans and high ribs give excellent water carrying capacity down to one degree roof pitch. LOKDEK 700 is suitable for domestic and commercial roofing and is available in a wide range of colours.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# STEELSPAN 700

Steel Span 700 is a practical, aesthetically pleasing roof and wall cladding material that adds value to any building. Made from light gauge, high tensile steel, it has an efficiently designed profile, making it light and able to span long distances. It is manufactured locally by continuously roll-forming prefinished material, resulting in a low cost, high quality product.

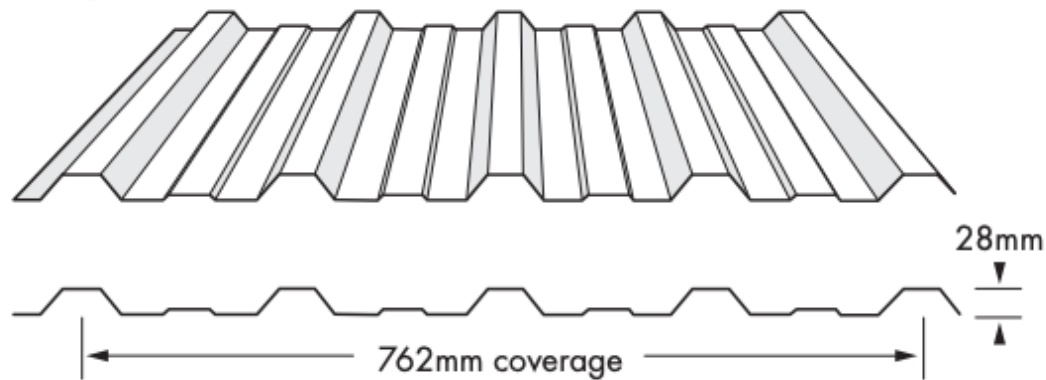

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# STEELCLAD

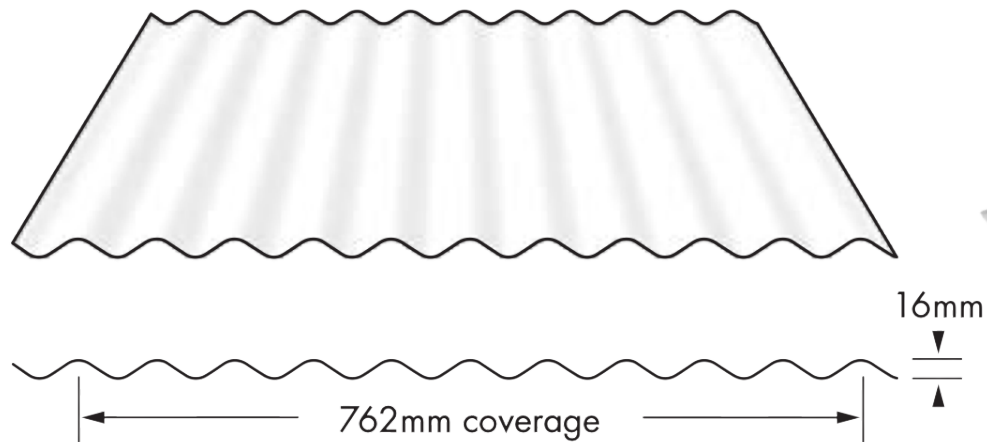

Steel Clad 762 is a modern, stylish, high strength, lightweight roof and wall cladding material. Made from high tensile steel, the profile has been engineered to give the highest strength and rigidity possible, whilst using the least material. Manufactured locally by continuous roll forming of prefinished steel coil, Steeline Steel Clad 762 is a low cost, high quality product.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# CORRUGATED

Corrugated 762 is a very popular and good looking, roof and wall material. Now made from light gauge, high tensile steel, it is strong, light and able to span longer distances. Manufactured locally by continuously roll-forming prefinished steel coil, Steeline Corrugated 762 is an economic and high quality product.

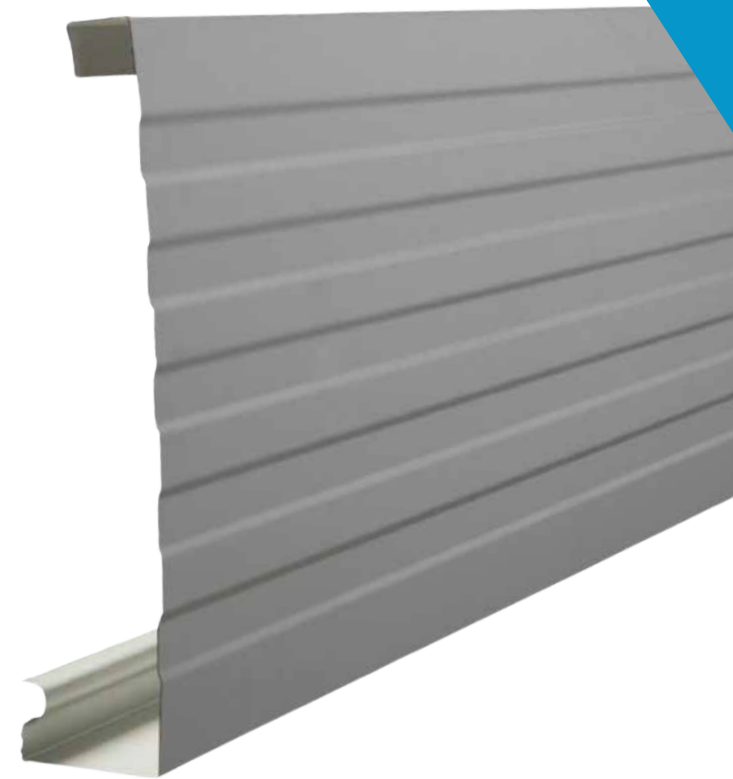

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# METAL FASCIA

Metal Fascia is the modern, good looking, economic alternative to timber. It forms part of a total system of rainwater goods such as Roof and Wall Cladding, Gutter, Capping and Downpipe, but can be used with any type of roof and gutter system. It is straight, true, shrink and warp proof, which gives years of life. Metal Fascia is used as both Fascia and Barge and is mounted on adjustable pressed steel brackets using a very simple fixing method. Metal Fascia cover is also available which can be used to reface timber fascia which has deteriorated.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# QUAD GUTTER

Steeline Quad gutter is a modern profile that suits a variety of building designs. Steeline Quad can now be supplied with or without overflow slots, protecting your home from water overflow. By using concealed brackets, Steeline Quad gutter is given a smooth, unobstructed appearance, made from materials that are strong and long lasting.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# SQUARE GUTTER

Square Gutter is an appealing, modern profile that suits a multitude of building designs. The continuity of the gutter line profile can be maintained on barges with the square barge capping. The medium gauge metal has rollformed ribs on the front face, offering great resistance to denting and a stylish, buckle free appearance.

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# HALF ROUND & ROUND FLO GUTTER

Steeline Half Round & Roundflo gutters are designed to compliment today's style of buildings and also look great on older period style homes. Half Round and Roundflo can be supplied with overflow slots to protect your home from water overflow.

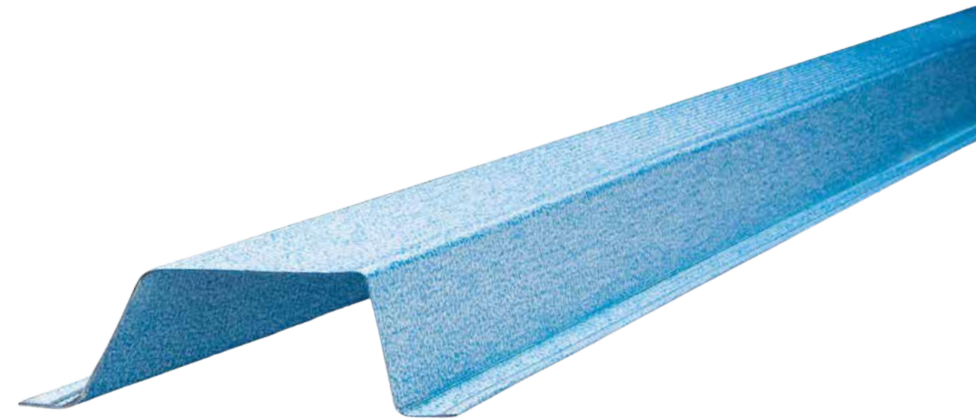

**AVAILABLE IN COLORBOND®, COLORBOND® MATT & ZINCALUME®**

# METAL ROOF BATTENS

Steeline metal Roof Battens are a versatile and easy to use batten, compatible with all roof claddings. They can be fixed directly to the rafters using screws through the flanges, with the roof cladding then fixed to the battens in accordance with manufacturers specifications.

**MADE FROM TRUECORE® STEEL**

# **UniCote<sup>®</sup>** / *LUX*

**WHERE ART MEETS STEEL**

UniCote®LUX is a pre-painted steel product has been designed with high-end Australian Architecture in mind.

UniCote®LUX offers a unique range of modern patterned and texture steel finishes, as a result of the worlds best coil coating technology. Steeline Canberra is excited to provide the Canberra construction and design industry access to the Ash Wood, Silver Quartz, Zinc Graphic, Weathered Iron, Corten Red and Metal Stone finishes. Other finishes are available as special order.

# VELUX®

VELUX® manufactures high quality skylights for both pitched and flat roofs. With more than 75 years of experience their products are some of the best tested solutions with world class quality. Talk to the team at Steeline Canberra about opening up your home with a VELUX® skylight.

# SPANTEC™

MAKING  
BUILDING  
EASY

Spantec™ is a leader in light structural steel beams and the largest steel flooring system specialist in Australia. Steeline Canberra supply Spantec's range of beams and brackets, flooring systems and decks.

# Versiclad

## INSULATED ROOF & WALL PANELS

Versiclad is a market leader in the manufacture of Structural Insulated Panels. Versiclad panels will not only keep you cool in summer and warm in winter, but deliver a comfortable atmosphere where ever you crave a relaxed environment. Self-mating, easily installed roof panels are available in a range of profiles and thicknesses to suit your desired insulation rating or trafficable free span requirement. Talk to the team at Steeline Canberra about how you can incorporate Versiclad panels in your project.
